

Apr 12, 1962

Dear co-workers:

I know you are anxious to hear what has happened during the three days of getting together in silence, or meditation. I use the word meditation for most people seem to know what it means; for it should be a form of placing of the mind in a neutral state; and in that way have it become receptive. But before that is attempted the mind should be placed in a high state of thought.

I am sorry for neglecting to give the European time. It was an oversight on my part, but it was good, for most of the European groups chose the time I should have designated. That proved one thing, that they were on the ball. It will be a little while before all of the reports will come in, where I will be able to evaluate them, according to my experience. So I want everyone to be patient and quit misunderstanding each other; for that is just what the Silent group would like.

Don't pay any attention to Dickenson's accusations, for they are as false as they can be; and he is using poor Lucy as an excuse; because she wrote him a nice letter last Christmas and he probably misinterpreted it in behalf of his own schemes, just like a few others are doing to whom she wrote. Lucy is not, to my knowledge, working with any Silent group, knowingly. The Silent group could have taken advantage of the separation and accuse her like Dickenson is trying to do.

In the tired state that she was in, perhaps she made a statement somewhere without the meaning of the kind they are now making out of it. I myself will swear by that, for all of us get off the beam sometimes, our minds are very tricky and sometimes try to grasp for straws. And if the Silent group can insinuate anything at all, to tear the unit apart, they are no one.

I had trouble with the same two men in New Zealand.

Now the best report I have received so far regarding my journey was from Holland, their reception was at least 75% true, which is very good having had no practice like this before.

Yes, I was on planet Saturn and beamed my voice personally to the earth. Planet Saturn is the Tribunal planet of our system. It was remarkable how my voice was received, in Holland and my words repeated distinctly and correctly. Hey d' Aquila deserves some credit for getting such people together on short notice. It is something that will never be forgotten.

I shall give more information later when all the reports are in. Most of it will not be for publication and will be confidential to those who participated in this program.

Later the Brothers may give me the privilege of releasing it to the public.

Now I will give you a clearance you have been waiting for, for some time. When my wife, Mary, passed away in 1954, I wondered, as I am human like yourselves, whether she really re-incarnated on planet Venus, as she stated she would do when she made the change from this world. For this doubt I was called down by Orthon, and was told that she did. That in a few years he would have proof for me, by bringing her to me or me to her. That promise was fulfilled.
